

I am writing to ask that you reconsider the expansion of LPFM allowing it priority over existing FM translators. I listen to K-LOVE on an FM translator in Colorado and I also support this station because I believe in the service it provides which is not only music but an encouraging broadcast unlike many stations on the air today. I am not afraid that my children will hear anything inappropriate or vulgar and it supports the family values that we are trying so hard to teach our children in these times. If you approve the displacement of these kind of stations, there will not be a "family oriented" choice on the air for our community. I think that allowing people to have the choice to listen to stations that do not promote violence or vulgarity is in the public interest simply for that reason - they give us the right to choose something better for our children and families. Please don't take away our rights and our choices.

Thank you-

Mrs. Michele Andrews
